The Journal of the Society for Reproduction and Fertility

May 2008

Volume 135

Part 5

www.reproduction-online.org

Pseudo-coloured, multi-photon image of a live mouse zygote showing serotonin-rich puncta in the cytoplasm. The male and female pro-nuclei and their nucleoli are visible. Blue pseudo-colour represents low serotonin concentrations while white represents high serotonin concentrations. Courtesy B Basu and M M Panicker.

Review

- What can we learn from gene expression profiling of mouse oocytes?** 581–592
Toshio Hamatani, Mitsutoshi Yamada, Hidenori Akutsu, Naoaki Kuji, Yoshiyuki Mochimaru, Mitsuko Takano, Masashi Toyoda, Kenji Miyado, Akihiro Umezawa and Yasunori Yoshimura

Research

- Expression of genes involved in prostaglandin E₂ and progesterone production in bovine cumulus–oocyte complexes during *in vitro* maturation and fertilization** 593–603
Fabienne Nuttinck, Brigitte Marquant-Le Guienne, Laetitia Clément, Pierrette Renaud, Gilles Charpigny and Bénédicte Grimard
- The interactions between cysteamine, cystine and cumulus cells increase the intracellular glutathione level and developmental capacity of goat cumulus-denuded oocytes** 605–611
Ping Zhou, Yan-Guang Wu, Qing Li, Guo-Cheng Lan, Gang Wang, Da Gao and Jing-He Tan
- Myristoylated alanine-rich C kinase substrate, but not Ca²⁺/calmodulin-dependent protein kinase II, is the mediator in cortical granules exocytosis** 613–624
Lina Tsaadon, Ruth Kaplan-Kraicer and Ruth Shalgi
- The tonicity of murine epididymal spermatozoa and their permeability towards common cryoprotectants and epididymal osmolytes** 625–633
T G Cooper, J P Barfield and C H Yeung
- Expression of genes involved in early cell fate decisions in human embryos and their regulation by growth factors** 635–647
S J Kimber, S F Sneddon, D J Bloor, A M El-Bareg, J A Hawkhead, A D Metcalfe, F D Houghton, H J Leese, A Rutherford, B A Lieberman and D R Brison
- Control of nuclear remodelling and subsequent *in vitro* development and methylation status of porcine nuclear transfer embryos** 649–656
D J Kwon, C K Park, B K Yang and H T Cheong
- Serotonin in pre-implantation mouse embryos is localized to the mitochondria and can modulate mitochondrial potential** 657–669
Basudha Basu, Radha Desai, J Balaji, Raghothama Chaerkady, V Sriram, Sudipta Maiti and Mitradas M Panicker

Glial-derived neurotrophic factor promotes ovarian primordial follicle development and cell–cell interactions during folliculogenesis Gretchen Dole, Eric E Nilsson and Michael K Skinner	671–682
Dietary unsaturated fatty acids influence preovulatory follicle characteristics in dairy cows M Zachut, A Arieli, H Lehrer, N Argov and U Moallem	683–692
Mono-(2-ethylhexyl) phthalate stimulates basal steroidogenesis by a cAMP-independent mechanism in mouse gonadal cells of both sexes David Gunnarsson, Per Leffler, Emelie Ekwurtzel, Gunilla Martinsson, Kui Liu and Gunnar Selstam	693–703
Relaxin (RLX) and estrogen affect estrogen receptor α, vascular endothelial growth factor, and RLX receptor expression in the neonatal porcine uterus and cervix Wenbo Yan, Joseph Chen, Anne A Wiley, Bethany D Crean-Harris, Frank F Bartol and Carol A Bagnell	705–712
Transgenerational epigenetic effects of the endocrine disruptor vinclozolin on pregnancies and female adult onset disease Eric E Nilsson, Matthew D Anway, Jacob Stanfield and Michael K Skinner	713–721
Effects of maternal cold exposure and nutrient restriction on the ghrelin receptor, the GH–IGF axis, and metabolic regulation in the postnatal ovine liver M A Hyatt, E A Butt, H Budge, T Stephenson and M E Symonds	723–732
Changes in LH secretion in response to an estradiol challenge in male- and female-oriented rams and in ewes F Stormshak, C T Estill, J A Resko and C E Roselli	733–738

Cover figure competition

Readers are invited to submit figures featuring research in reproductive biology for consideration for use as the cover figure of *Reproduction*. Figures must be of high quality and resolution of 300dpi at the final published size (280 mm × 210 mm). Please contact the editorial office (reproduction@bioscientifica.com) for further information. Readers who provide images that are selected for use on the cover will be awarded a prize of £100.
